MICROTURBO

MICROTURBO was founded in 1961 and employs today 600 people. MICROTURBO, a subsidiary of Turbomeca and a part of the SAFRAN Group of companies, is one of the world leaders in gas turbine applications, with electrical power up to 350 kW and thrust up to 600 daN. MICROTURBO is specialized in the design, development and production of turbojet engines for applications on missiles, target drones and remotely piloted vehicles (missiles Sea Eagle, Apache A, Storm Shadow / Scalp EG from MBDA, NSM from Kongsberg Defence & Aerospace, etc.). MICROTURBO designs and manufactures a wide range of starters. Depending on aircraft architecture, power transfer can be either mechanical or pneumatic. MICROTURBO designs and manufactures APUs which simultaneously supply electrical energy and an air bleed for the air conditioning system, both on the ground and in flight. They are integrated in a wide range of civil aircraft (Falcon, Bombardier water bomber CL415), military aircraft (Jaguar, Hawk, Rafale) or helicopters (Super Puma and NH90). Microturbo has officially launched last year a new generation of APU providing exclusively electrical power (the e-APU) which is dedicated to business jets aircraft family. MICROTURBO products ground power units (GPUs), with a range of power from 20 kW to 150 kW (Armoured Fighting Vehicles, Ground Starters for airplanes, Smoke Generators, turbo pumps). For further information, you can visit the following web sites: MICROTURBO : www.microtubo.fr

SECTEUR PRODUCTIQUE

Industrial plant design and reorganization.

Our Job: ENGINEERING / EXPERTISE

(Lean manufacturing, Process, Supply Chain).

Our know-how: Feasibility / Design / Re-organization.

- Process program (manufacturing, assembly),
- Bulding program,
- Master plan,
- Industrial logistic,
- Characterization and dimensioning of factory, workshop, tools and handling facilities,
- Layout and 3D animation,
- Industrial transfert.

Secteur Productique eliminates wastes and anticipates production reorganization and information tools to meet increased orders.

Secteur Productique establishes Lean Manufacturing methods:

- Reduce production cycle,
- Reduce workpackage unit costs,
- Control risk,
- Improve logistic flow,
- Adapt handling,
- Propose innovative processes,
- Optimise workstation organization.

THALES UNDERWATER SYSTEMS SAS

Thales Underwater Systems is the major supplier of sonar and allied systems to Naval Forces worldwide.

In addition to its three domestic customers, TUS has an international customer base of about 40 nations.

The company is the only Sonar system supplier which provides a complete range of systems :

- for Anti Submarine Warfare (ASW) and Mine Warfare,
- for use by all platforms : nuclear and conventional submarines, Surface ships, fixed-winged aircraft and helicopters, Minehunters and Unmanned Underwater Vehicles.

In addition, Thales Underwater Systems supplies Torpedo homing heads and Ports Security systems.

These products are backed by a comprehensive range of Customer Support products and services.

FRANCE

TRESCAL SA

Trescal is a truly global specialist in calibration and measurement service solutions for the industry.

Metrology services include calibration, maintenance and repair of test and measurement equipment. Trescal also offer customised calibration management software solutions, metrology and technical support, and training.

TURBOMECA

Turbomeca is a world leader in the market for civil and parapublic helicopters (EMS, police, etc.) and holds a predominant position in the market for military helicopters. Turbomeca offers the largest engine power range, from 450 to 3,000 shp, and powers the most famous names in the helicopter manufacturing industry

FRANCE

VODEA

Since 2003, Vodéa has been recognized for the high quality video products to optimize image processing chain in embedded systems:

Mission monitoring (observation, intelligence).

Surveillance and security.

Qualification Systems (Flight Test).

Vodéa is specialized in the design of:

Video encoding Mpeg2 or Mpeg4 AVC/H264

High resolution capturing and processing 1080p or 720p standard at 60 Frames/s

Interoperability Stanag 4609 and video over IP

Time code and metadatas synchronized within TS stream

After completion of the video over IP system for the "Rafale" Aircraft, the STANAG 4609 multiplexer for UAV, the micro-cartridge recorder for the cinema, Vodéa propose Fusion H264 product (high definition video encoding) for your new video camera inside aircraft or rail.
